SS-VAULT screen:

Guides users
Through the entire
Process with Easy-to flow
instruction

Fingerprint reader:

Once customer enters PIN,
fingerprint is read for safe ,
secure and accurate
access

The SS-vault system offers the ultimate solution for unescorted access and control. Customers can access their safe deposit box without assistance from branch person—thereby boosting branch productivity and customer satisfaction

Enrolled customer goes directly to the biometric terminal and logs in with a unique .Customer places finger onto fingerprint reader and is authenticated. Customer then enters the vault.

The customer inserts the key into their safe deposit box. opens their box.

When finished, the customer locks their box.

Customer places finger onto fingerprint reader then leave the vault.
